## **EDUCATION in SCHOOL of FOREIGN LANGUAGES**

Before starting their major, as required by regulations and their departments, most students are required to have a high English language proficiency level and good command of English to be able to follow the courses in their departments with success. With this purpose, in Basic Languages Department, students attend a compulsory or elective intensive English language program.

Basic Languages Department aims to increase the English proficiency level of the students and prepare them for their undergraduate work as the language of instruction for some of the academic programs in Anadolu University are in English. It provides students from various departments and at different language proficiency levels with basic English in a nurturing and supportive teaching and learning environment to comprehend and react to what they read and hear, and to express themselves through written and oral language so that students can communicate effectively in various (their) academic, professional and social contexts. To achieve the general goals of the program, School of Foreign Languages follows a skill-based curriculum in which students at various proficiency levels attend courses of Integrated Listening and Speaking, Reading, Writing and Grammar-in-Context.

A further aim of the Basic Languages Department is to broaden students' vision by encouraging them to become autonomous learners who are competent in pursuing the advances in the international academic and scientific arena.
